

Todd County Livestock Registrations Due for 2018 Cycle!!!!

What's new?

The Todd County Feedlot Program is registering farms, ranches and feedlots by geographical region to more evenly distribute registration work load.

How?

The adjacent map show the regional zones and years registrations will be due.

The Northeast region of the County will be asked update registration in 2018; the Southeast in 2019; the Southwest in 2020; and the Northwest in 2021. See map on the back side.

The cycle will repeat in the same pattern for 2022 through 2025.

When? Registration updates are due within 30 days upon receipt of the letter.

Who?

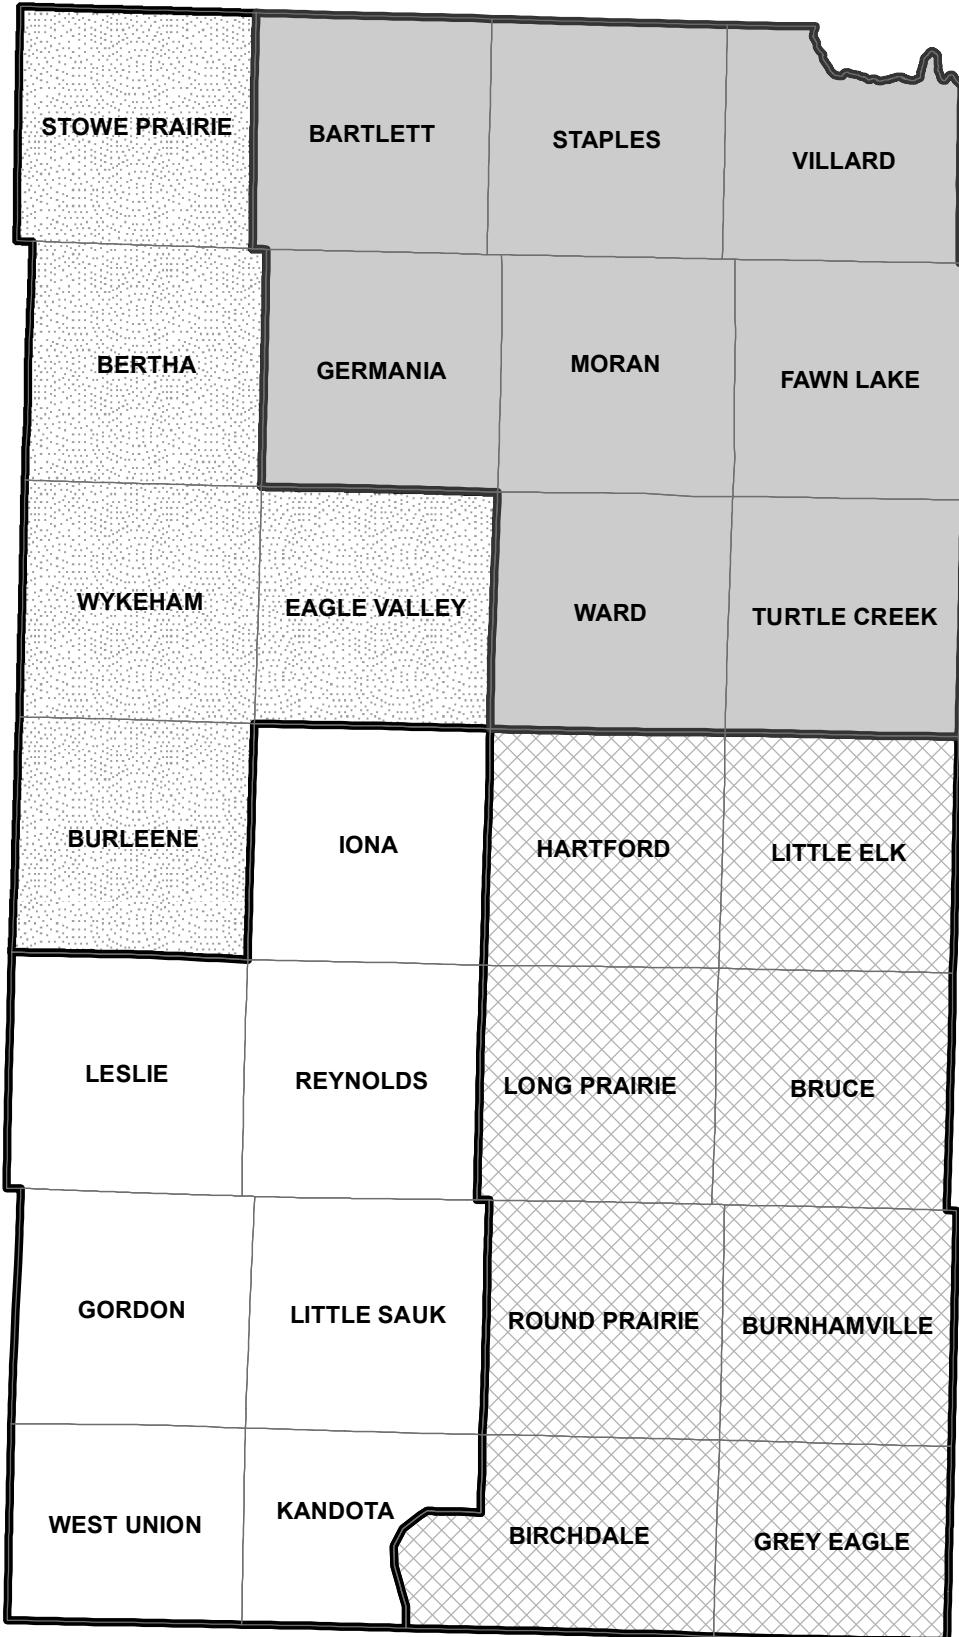

- All landowners with who receive a registration in the mail will be asked to respond. You may update registration over the phone. **320-732-2644**.
- Landowners, no longer having livestock on premise, with outbuildings and/or fences who wish to remain registered for resale or zoning purposes are required to respond to maintain registration.
- Any new or unregistered livestock owner (within the last 4 years) in Todd County is required to register if you raise 10 or more animal units.
- Any landowner who has a liquid manure pit (in use, not in use, full, or empty) on his/her property is required by state law to remain registered.

Why?

- Registrations for livestock confined to lots and/ or barns at any time or season are required by Todd County Ordinance and the Minnesota Pollution Control Agency for water quality inventory purposes.
- Maintaining continual registration for livestock sites in Todd County provides landowners certain zoning change protections and rights pertaining to the raising of livestock.
- Livestock registration aids Emergency Response Teams in the event of a disease outbreak such as the recent 2015 Avian Flu by locating and identifying potentially impacted farm sites, number of head and species impacted, and in providing safe zones for farms and residences in the event of such catastrophe.
